DETAILED ACTION

Claim 9 is canceled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 14, are rejected under 35 U.S.C. 102(b) as being anticipated by Mieyal.

Regarding claim 1, Mieyal shows an elongated metal stud (26) having a generally U-shaped cross section including a main portion and having first and second side members (31, 32) attached.

Mieyal shows a first receiver (10b) attached to the main portion of the stud member (26) and spaced inwardly a predetermined distance from the first and second side members (31, 32).

Mieyal shows a clip member (63) having a first portion (63) and having at least a first elongated stabilizing bar (43) attached thereto and extending downwardly to slidably engage the first receiver (10b) on the stud member (26). (Fig. 2, 4)

Mieyal shows a ceiling track (53) extending along the length of the top of a non-load bearing wall and including first and second (58) spaced apart downwardly extending flanges, and further, third and fourth (62) spaced apart downwardly extending flanges located outwardly, respectively, of the first and second downwardly extending flanges. (Fig. 3)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mieyal.

Regarding method claims 10-13, the claimed methods are the obvious methods of installing Mieyal's extendable stud for partition walls or the like.

Claim Objections

Claims 2-8, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 2 is allowable for the first and second elongated stabilizing bars.

Claims 3-5 depend from claim 2 and are therefore allowable.

Claim 6 is allowable for the hollow channel receiver.

Claims 7, 8, depend from claim 6 and are therefore allowable.

Response to Arguments

Applicant's arguments, see Amendment A, filed 12/22/03, with respect to the rejection(s) of claim(s) 1, 6, 8, 10-13, under USC 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Mieyal.
